

ENVIRONMENTAL POLICY STATEMENT

Pump Technology Ltd are providers of highly reliable precision engineered products. Pump Technology Ltd has implemented an Environmental Management System throughout the Company in order to demonstrate its commitment to protecting the Environment for the benefit of our employees, local and global communities, now and in the future.

To accomplish this Pump Technology Ltd will:

- Comply with the letter and spirit of all Environmental Laws and Regulations
- Review the environmental impact of all activities and continually strive to reduce our overall impact and prevent pollution
- Where practical; reduce waste and environmental pollutants; recycle waste materials, reducing our impact on landfill and other disposal methods
- Reduce energy usage by effective use of lighting, heating and machinery, thus reducing our impact on fossil fuel consumption and atmospheric emissions
- Prevent pollution of the environment from spills of oils, solvents, etc
- Consider incorporating the largest possible proportion of recyclable and environmentally compatible materials, when designing our products
- Involve all employees in the environmental programme, providing any necessary training to enable them to discharge their responsibilities
- Commit to a process of continual improvement of our environmental performance by instituting the objectives and targets established in our Environmental Management System

The Directors and management at Pump Technology Ltd are fully committed to the Environmental Management System and satisfying the requirements of ISO14001:2004
